[Jeremy Sanchez](#) |

PROFESSIONAL SUMMARY

Programmer Analyst with experience in data engineering and artificial intelligence, specialized in Python, JavaScript and PostgreSQL. Experience as Data Engineer Jr in legal AI projects and as CTO in global social entrepreneurship competition (Hult Prize 2025). Data visualization domain with D3.js, Power BI, and Looker Studio. More than 10 certifications in data analysis, Scrum, and programming. Problem-solving, critical thinking, and teamwork-oriented.

TECHNICAL SKILLS

Programming Languages: Python (advanced), JavaScript, Java, Kotlin, C#

Frontend: Next.js, Bootstrap, HTML5, CSS3, D3.js

Bases de Datos: PostgreSQL, MongoDB, SQL Server

Data Visualization and Analysis: Power BI, Looker Studio, Advanced Excel

Cloud y Herramientas: AWS (VPC, S3, Route 53), Git, GitHub, Figma

Methodologies: Scrum, Web Scraping, Relational Database Design

PROFESSIONAL EXPERIENCE

Data Engineer Jr

December 2024 – April 2025 Lexia – AI-Powered Paralegal, Lima, Peru (Remote)

- I designed relational schema in PostgreSQL (tables, relationships, and foreign keys) to organize datasets and facilitate the subsequent ingestion and visualization of data.
- I loaded initial datasets into PostgreSQL, laying the foundation for interactive dashboards and charts prior to the availability of actual data.
- I developed interactive visualizations with D3.js (animated bar graphs and dynamic lines) to communicate insights and support decision-making.
- I created dashboards in Looker Studio connected to PostgreSQL, optimizing the data analysis of the product team.
- Implemented web scraping pipelines with Python and Node.js for automatic extraction of public data, improving operational efficiency.
- I collaborated in Scrum methodology with daily meetings by Google Meet, managing tasks and deliverables in sprints.

Chief Technology Officer (CTO)

January 2025 – April 2025 Hult Prize 2025 – MyPersonnel Project, Lima, Peru

- I led the technological vision of the MyPersonnel product in a global social entrepreneurship competition with impact in +10 countries.
- I designed the complete landing page prototype and product architecture in Figma, aligning design with business objectives.
- I coordinated ideation, decision-making, and document management meetings in Google Drive for the technical team.
- I researched the legal framework of the business model to ensure viability and regulatory compliance of the product.

EDUCATION

Software Engineering

March 2023 – Ongoing Universidad Autónoma del Perú, Villa El Salvador, Lima

CERTIFICATIONS

Programmer Analyst	<i>November 2025 Universidad Autónoma del Perú</i>
Power BI	<i>October – November 2024 Skill Training Center</i>
Data Analytics with Power BI	<i>January 2024 UPC / Grupo Romero Scholarships</i>
Transformative Data Analytics	<i>October – November 2024 UNICOC</i>
Scrum Foundation Professional Certification (SFPC)	<i>October 2024 CertiProf</i>
Intermediate Python Programming	<i>August 2024 National University of Engineering (UNI)</i>

SKILLS AND LANGUAGES

Competencies: Analytical skills, problem solving, critical thinking, adaptability, teamwork, technical leadership

Languages: Spanish (native) | English (basic – reading, writing and speaking)
